TELEHEALTH

Our Telehealth program expedites patient care by connecting hospital to hospital and doctor to doctor via the latest wireless and video technology. The Transfer Center manages our Telehealth services, coordinating communication and collecting data necessary to facilitate Telehealth transfers from the routine to the complex.

We currently offer the following **Telehealth services:**

- Tele-Stroke
- Tele-Psych
- Tele-ICU
- Tele-EEG
- Tele-Nephrology

Completes the doctor referral requirement while simultaneously finding the best transport option by air or ground

Ensures rapid transfer processes are followed to move acute patients as quickly as possible

Removes the "static" involved in complex patient transfers so care providers can focus on what they do best
